

# Road Watch in the Pass

MIISTAKIS  
INSTITUTE

Update to Participants Number 14 ([www.rockies.ca/roadwatch](http://www.rockies.ca/roadwatch))

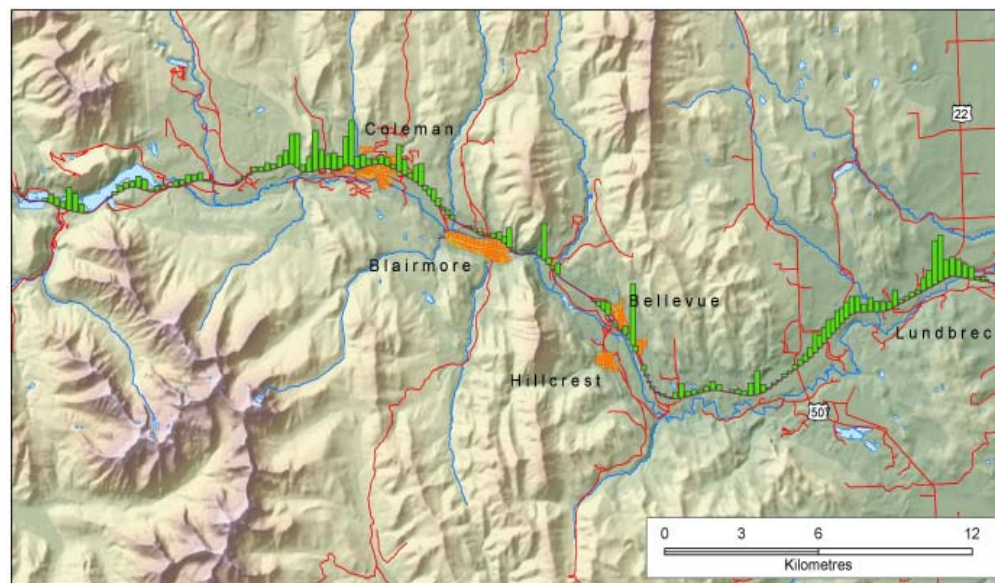

With generous support from the Woodcock Foundation, Alberta Ecotrust Foundation, Calgary Foundation and Mountain Equipment Co-op.

## Road Watch Poster Contest

In the winter of 2007 Road Watch held a wildlife poster contest. Children from local schools were asked to think about wildlife and Highway 3 and draw their interpretation of wildlife crossing Highway 3. The contest took place in association with the Wildlife Crossing Display hosted by Crowsnest Conservation Society to promote understanding of wildlife and transportation issues in the region. The contest attracted 50 entries; winners were selected for three categories for two age groups. All the posters were recently displayed in the Pass at the local Art Gallery in Frank. Winning posters can be view on the roadwatch website contest page ([www.rockies.ca/roadwatch](http://www.rockies.ca/roadwatch)).

First Prize Elementary: Morgan

Number of Road Watch deer observations per 250 m segment along Highway 3. A higher bar represents more observations per segment. Includes all observations, dead, alive, crossing and adjacent with 100m of Highway 3.

## Road Watch Data Update

There are currently 3500 observations in the Road Watch database. Of these observations 1599 are deer within 100 m of Highway 3. Look out for deer along along Highway 3 especially along the section from Rock Creek Road to east of the Highway 22 junction .

## What's New

A new driving survey is being implement by Road Watch using the Otto Wildlife Companion, a GPS unit that has been desinged specifically for Road Watch. To Learn more about this new component check out the new driving survey page on the Road Watch website.

In early June 2008, Rob will be attending a Road Ecology Course focused on the Snoqualmie Pass in Washington. Rob will let us know about his experience when he returns.
