I'M A CALGARIAN

DAM, I'M BUSY!

One of nature's original engineers, Beavers create impressive dams, canals, and lodges that help store water, support biodiversity, and create habitat.

BEAVER

I BUILD FOR THE WHOLE NEIGHBOURHOOD.
I create habitat for many other species like frogs, fish, and birds. Give us all room to thrive by staying on designated trails.

I KNOW A THING OR TWO ABOUT WATER MANAGEMENT. My dams improve water storage and filtration, protect source waters, and provide natural flood mitigation.

I HAVE A TASTE FOR WATERFRONT PROPERTY.
Trees and shrubs along waterways are both my food and building supplies. Wrapping or protecting priority trees help us coexist.

MY WORK ISN'T ALWAYS CONVENIENT.
Sometimes I cause flooded trails or roads. There are solutions that help us coexist while keeping the ecosystem benefits I provide!
