I'M A CALGARIAN

I GO WITH THE FLOW.

Native fish support food webs, signal environment health, and depend on connected, healthy waterways. Protect water quality and keep streams flowing so they can thrive, and so can you.

FISH

WHAT YOU DO UPSTREAM MATTERS A LOT TO ME. I'm sensitive to pollution, temperature changes, and low oxygen levels. Keep waterways clean by considering what goes on your lawn and down the drain.

I KEEP THINGS IN BALANCE. Native fish like Bull Trout, Northern Pike, and Sucker Fish eat insect larvae and help regulate mosquito numbers, keeping aquatic food webs healthy and stable.

I NEED A CLEAR PATH TO GET AROUND. Rock dams and river blockages can stop me from reaching food and spawning habitat. Please leave rivers natural so I can move freely.
