WE ARE CALGARIANS

WE ARE CALGARIANS – WE USE A TRANSIT SYSTEM TOO!

Our journeys depend on connected natural spaces – not roads or rails. When ecological connectivity is intact, we can survive and thrive.

NATURE'S NETWORK

OUR ROUTES DON'T SHOW UP ON GOOGLE MAPS. Instead of using Sarcee Trail or the Ctrain, we use parks and natural spaces to get around.

WE KNOW WHERE TO FIND A GOOD MEAL. Please don't feed us and keep garbage and other attractants secure. We've got our own menu.

HEALTHY CITIES MAKE SPACE FOR WILDLIFE. Our survival depends on connected habitats, but roads and development can break these links. When wildlife crossings and natural corridors are provided, combined with 'leave no trace' practices, our pathways stay connected.
