# I'M A CALGARIAN

## I KEEP CALGARY BLOOMING!

**Pollinators do the heavy lifting when it comes to your garden and your food. To support them, plant native species and skip pesticides.**

# POLLINATOR

**I'M DOCILE!** We aren't aggressive – even native bees rarely sting unless disturbed.

**I KEEP GARDENS BLOOMING AND FOOD GROWING.** 75-90% of all flowering plants require our pollination services to stay alive.

**HELP ME MAKE IT THROUGH WINTER!** Leaving leaf litter, hollow stems, and plant debris in your yard helps me take shelter.

**APPRECIATE NATURALIZED AREAS.** They may look "messy" when you are used to seeing manicured areas, but they provide important habitat for us and play a key role in a healthy ecosystem.

**CALGARY IS A BEE CITY,** committed to protecting and creating habitat for pollinators like bees, butterflies, moths, and other insects that are essential for healthy ecosystems and food production.
